

# HOW THE COVID-19 PANDEMIC DISRUPTED YARD PROCESSES AND DROVE IMPROVEMENTS

## BEFORE 2020...

Throughout recent decades, warehouses and transportation have undergone continuous optimization...**the yard has not!**

## OUTDATED PROCESSES

## AND LOTS OF ISSUES

- Low levels of visibility
- Extended dwell and waiting times
- Peaks & troughs in utilization
- Inefficient usage of labour
- Delays and disorganization

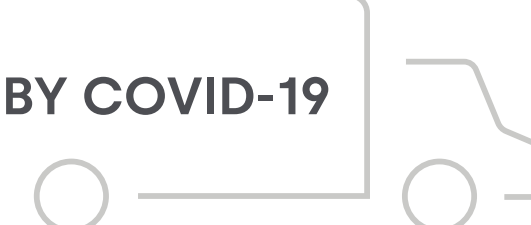

This is a huge problem because it's directly affecting not only the pure cost of the driver and equipment waiting, but also overall productivity.

**Ilario Dissegna,**  
CEO of Dissegna Logistics  
Industry Leader Talk: Cutting Wait Times with Real-Time Data

The situation in the midst of the Covid-19 pandemic was so disruptive. This disruption was felt in certain factories and distribution centres. The availability of the workforce was limited and waiting times exploded.

## DISRUPTION DRIVEN BY COVID-19

More mobile solutions

Spotlight on self-service

Demand for digitization

Automation of manual process

Call for collaboration

Advanced analytics

**SOCIAL DISTANCING = DIGITAL CONNECTION**

## It became crystal clear that today's Yard Management needs...

...greater efficiency and more collaboration with carriers  
...to be more dynamic, more automated, and more transparent

## WITH A DYNAMIC, REAL-TIME INFUSED YMS...

### YOUR BUSINESS IS BETTER

- Better planning
- Reliable information
- Save time and money

### YOU AVOID MISTAKES

- Everything is running optimally
- Capacities are utilized equally
- Solve problems quickly and easily

### YOU STAND OUT AGAINST THE COMPETITION

- Improved collaboration between carriers and drivers
- Better communication
- Reduce risk of misunderstandings

With a collaborative and partner-based approach, we were able to solve the issues and find a solution. And carriers know that they are valued partners.

**Steffen Brill,**  
Senior Director of Logistics,  
Procurement and Execution at K+S  
Industry Leader Talk: Cutting Wait Times with Real-Time Data

## THE FUTURE OF YARD MANAGEMENT STARTS NOW!

Proactive alerts mean you're always in the know about the next critical tasks to complete and have better awareness of issues or deviations in advance of arrivals.

It's predictive!

It's in real time!

Infused and driven by real-time data, our YMS reschedules based on the ETA, improving processes, balancing utilization and cutting costs.

Dock Scheduling, Real-Time Visibility, Yard Management and Yard Automation are offered as one bundle of integrated solutions

It's a „one-stop-solution“!

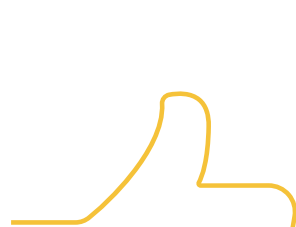

This integrated solution increases real-time visibility between transport and yard operations. This is an absolutely unique offering for the digital logistic market.

**Leander Naessens,**  
CEO of Peripass  
Industry Leader Talk: Cutting Wait Times with Real-Time Data

powered by

By combining the two best offerings approaching the yard, from the timeslot and from the physical yard, and all in real time, demonstrates the strength of our platform and delivers a fully integrated experience to our customers.
